MOBILEINSPECTION brings the complete capabilities of a laptop to the equipment testing and review environment.

MOBILEINSPECTION assures accuracy while increasing efficiency, delivering a quick return on investment.

MOBILEINSPECTION can offer a complete set of data capture options such as equipment location, service status, and equipment definition (model, serial, and category).

MOBILEINSPECTION provides historical information and reporting to insure integrity of the testing and review process.

MOBILEINSPECTION data capture items in detail:

Equipment ID Scan
 Model Number
 Serial Number Capture
 Service Status

Equipment Location
 User Notes
 Technician ID
 Technician Signature

Inspection Maintenance
 First Inventory
 Inventory Movement
 Location Check

Benefits:

- Reduces manual entry and improves speed, accuracy, and information capture.
- Database capture of all information provides for a highly detailed database, allowing for a myriad of reports including inventory, service history, equipment location, and status.
- Scanning or RFID capture of the equipment ID and information.
- Optional photo capture of equipment.
- Optional "hard ticket" generation for equipment.
